DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, the phrase "such as" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention.

See MPEP § 2173.05(d).

Claim 2 recites the limitation "the host". There is insufficient antecedent basis for this limitation in the claim.

Claim 2 recites "characterized by the absence of processing means". It is indefinite whether this limitation describes the method of "exchanging data" or "a card reader".

Claim 3 recites the limitation "the reset input" in line 2-3. There is insufficient antecedent basis for this limitation in the claim.

Claim 14 recites the limitations "the ISO contact C1", "...C2", "...C3", "...C5", "...C7". There is insufficient antecedent basis for these limitations in the claim.

Claims 4 - 13 are rejected because of their dependency.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-2 are rejected under 35 U.S.C. 102(e) as being anticipated by Landry et al. (US Patent # 6,687,350).

As per claim 1, Landry discloses a secure memory device for a smart card with a mode interface comprising:

- a rewritable memory (page 6, line 52)
- a processing unit or a microprocessor (page 6, lines 50-51)
- an on-chip oscillator (page 5, lines 60-62)
- an ISO 7816 interface (page 6, lines 53-55)
- a one-wire modem interface (page 5, line 25; figure 2)

and characterized in that both communication interfaces are bidirectional and share the same I/O terminal. (page 6, lines 55-56; lines 24-26; page 7, lines 37-43)

As per claim 2, Landry discloses a secure memory device as in claim 1, exchanging data with a host in the form of a modulated signal by means of a card reader characterized by the absence of processing means. (page 7, lines 37-43)
